Re: Grants as a Funding Source for Existing Infrastructure

Enclosed is a partial list of grants that the City of Newport has secured over the years to help off-set the cost of financing capital improvements to its infrastructure. The list does not include City matching funds, the amounts of which vary from grant to grant. Planning grants are also listed, as in many cases the work that resulted from those grants positioned the City so that it could effectively compete for construction funds.

Outside of water and sewer, the City has limited dedicated funds for the construction of capital projects. It has historically sought to leverage grants for projects where its needs closely align with the policy objectives of the grant authorities. The City has further invested in the types of advance planning needed to assure state and federal partners that it has fully vetted its concepts with the public and has a realistic understanding of the scope of its planned projects and associated costs. Since 2009 the City has successfully secured more than \$28 million in grant funds. This represents a substantial portion of the City's capital projects budget.
